CHARLIE PELLE

PROFILE

I am a dedicated Backend Developer with specialization in server-side programming, managing MySQL databases, and system architecture. My background in PHP, Java, Laravel, JavaScript (Node.js), and MySQL allows me to provide creative solutions that improve usability and functionality. My ability to work with frontend development teams is facilitated by my technical versatility in HTML and CSS. I constantly work to stay current with new technologies and software development best practices since I am passionate about fixing problems and improving system efficiency.
